

## Off the roads

available for pre-buy

4K 4x52'

Off The Roads takes you on a trip across Europe to discover its most beautiful natural areas. The non-hosted documentary series will highlight the richness and uniqueness of European biodiversity while raising awareness about the environmental challenges they are / will be facing. Beautifully shot in 4K, this documentary series is an invitation to travel and feel nature sustainably.

## Paris, Capital of Gastronomy

4K 1x52' or 1x90'

Paris is a city of history, monuments, feelings... but it is also a land of cafés, bistros, brasseries and restaurants! If gastronomy has existed for millennia, it is in the French capital that it took its modern form. The City of Light is undoubtedly the gastronomic beacon of the world. How did Paris become the cradle of gastronomy? How does the city manage to stay on top today? This documentary goes back in time in search of the tastes and flavors that make Paris the capital of gastronomy.

## A year at the Pic du Midi

1x52'

The Pic du Midi de Bigorre is a multi-faceted mountain, an old lady whose history is rich in several lives and whose aura dominates an entire territory. With the installation of a scientific platform, then an astronomical observatory, with its recent opening to the general public, it has been able to constantly evolve and reinvent itself. To portray this mountain is to hear the science that is practiced there, the history that is transmitted there, the tourism that it engenders, the poetry that emerges from it.

## Emergency Lands

4x52'

While climate change affects us all, those whose lives are transformed by the effects of global warming are often on the other side of the world. Rising waters in the Pacific islands, melting ice on the peaks of the Himalayas, advance of the desert, deforestation of the equatorial jungle... Faced with these threats, the peoples of these precious and fragile ecosystems devote their whole lives to finding solutions. They are resilient. How do they struggle daily to adapt to the effects of climate change? What innovations and alternatives are they developing? This is what this series presented by journalist Guy Lagache offers to explore.

## Customize your home

33x26'

Sofia Parapluie has the key to make your home different. Lover of Nordic decor and very creative, our expert teaches us DIY ideas to get your dream home. The dream of a lifetime, that of Jacqueline Uwera, herself with a disability, today artistic director of this unique event which brings together the world of fashion around her project. Great designers, apprentice designers and volunteer designers will be brought together in this adventure. A subject that raises a real problem: how to think about fashion through disability?

## *Unveiling the Amazon Highlands*

available for pre-buy

1x52'

A team of scientists go on an expedition to a yet unexplored area of the Brazilian Amazonia in order to discover new animal and vegetal species to better protect these ecosystems.

## *Women at conservancy*

1x45'

From the treetops of the Amazon to the desert valleys of the Caatinga, researchers stand out for their commitment and the success of their projects aimed at conserving endangered species of Brazilian fauna. In a world of physical, logistical and political challenges, researchers continue to take the lead in study programs in the most remote parts of Brazil.

## *Pastry for everyone*

44x26'

You will learn how to make a variety of desserts made by Carlos Fernandes, award-winning Pastry Chef. From traditional Portuguese sweets like sponge cake to the most incredible pies like the coffee, hazelnut and toffee pie, or the pear, almond and spice pie. The young pastry chef teaches how to master a multitude of techniques so that everyone can enjoy pastry delicacies at home.

## *Shapers of Tomorrow - Season 2*

12x52'

The Shapers of Tomorrow are back for a second season. Scientists, engineers, researchers, architects, teachers, they are all working towards a better future whether it is in health security, transport, environment, ... From great discoveries to new technologies, they are behind the discoveries and inventions that will design our future life to make it brighter, smarter and more sustainable.

## Legend Hunters

20x7'

Are there alligators in the sewers of Paris? Can we get stuck when we squint? Can we fly away with birthday balloons? Is there a product that colors pee in swimming pools? They have been running around the world for years, being exchanged in playgrounds, sometimes used to scare each other and yet they are false: urban legends! In the form of an investigation conducted by a band of Legend Hunters, each program tells a legend, explains where it comes from and why it is false, even if it is sometimes based on some real facts.

## Cinderella 24

18x26'

In this new edition, Ciro Florio's team expands with new professionals because Florio, a beauty craftsman, wants to truly fulfill the wishes of the Cinderellas (woman or man) with an exceptional team. In each episode, Ciro will fulfill the dream of two protagonists: one protagonist who will tell his story and rely on the care of Ciro and his beauty team for a dream that will last only 24 hours. A second protagonist will be told in express mode, Ciro will answer a call for help for a quick makeover.

## The 4 seasons of an hedge

1x52'

Abandoned yesterday, brutally uprooted, considered useless, hedges are back in the spotlight today. Emblems of biodiversity, they are replanted by associations, volunteers and committed professionals. The hedges offer a concert of images, a vegetal and harmonious refuge. From the dawn of autumn to the end of summer, we contemplate the virtuous furrow between Man and Nature. The music will orchestrate the activity of the hedges over the four seasons, making Nature the first musician.

## Science Mission

12x26' & 6x52'

This documentary series follows scientists daily, highlighting these powerless superheroes. The protagonists are experts in different fields and risk their lives every day to investigate in order to improve our understanding of the world, and to answer questions such as: How much have glaciers retreated with global warming? whales on their migratory routes? or when could the next volcanic eruption occur?

## Riding the Via de la Plata

13x26'

Ruiz Cabestany, a former professional cyclist, rides the Vía de la Plata, which crosses Spain from south to north, from Seville to Gijón. Its route is more extensive, since it begins in Cádiz, where the Vía Augusta begins, which later joins the Route of the Vía de la Plata.

## Zero waste Kitchen

12x26'

While Brazil is among the top food producing countries in the world, it is also one of the leaders in food waste. A country where today 33 million people are starving and about a third of its population has some kind of food vulnerability. Chef Edson Leite has come up with a way to use the full potential of all ingredients, with just one rule: no waste. When Edson came back to Brazil, he started to teach vulnerable communities in favelas how to eat better while spending less money.

## Fashion Africa

2x52'

Africa loves fashion, and the least we can say is that it excites the world of designers... For decades, the biggest names in haute couture, Yves Saint Laurent, Marc Jacobs or again Jean Paul Gaultier, are inspired by the fabrics, materials and patterns of the black continent...

But how is fashion in Africa? How is the sector managed? Is it profitable? Autonomous? And how is this sector, by definition avant-garde, perceived by the majority of the population?

## Rajat Hampat Coral

1x52'

Considered one of the most beautiful places on earth, the Raja Ampat archipelago in West Papua is well known for its rich underwater biodiversity. The last bastion of coral, the importance of its conservation depends on the survival of many marine species, as well as the balance of an entire ecosystem. This documentary takes us to meet the islanders who live there, in contact with the ocean.

## Walking on the waves

13x26'

This documentary series combines the journey of pilgrims on the Camino de Santiago and the journey of a surfer. Kepa Acero, an adventurous surfer begins his first stage on his bike with his surfboards attached to a trailer.

## Black Cockatoo crisis

1x90'

Urban agriculture is a concrete response to the need for city dwellers to reconnect with nature as well as to the desire for "local" food acclaimed by the citizens. In Paris, in some of the most densely populated neighborhoods in Europe, various initiatives are trying to design a more human and more autonomous city to feed itself.
